to the trade between Chill and California.

Two ventures have been made to the coast of California, one of provisions to the amount of \$20,000, and the other of foreign manufactured goods to the amount of \$80,000. The accounts from that market are so inspiriting that it is probable farther ventures will be made. Since the incorporation of that country into the nited States, the duties have been removed from imports of North American manufactures the which will end to lighten this market much of such goods.
